Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 10-11, 13-22, 24-25, 27-37, 39-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Dorsch (US 3847716).

Dorsch discloses the claimed invention including *inter alia* a filament-wound tank apparatus comprising a tank; a wound filament structure extending externally around and reinforcing said tank, said wound filament structure having an outer surface; at least one single layer, open weave reinforcing patch disposed between said tank and said outer surface of said wound filament structure and being secured to said wound filament structure; and an opening extending into the interior of said tank from said outer surface of said wound filament structure and through said at least one patch.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9, 12, 23, 26, 38, 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dorsch.

Art Unit: 3742

Dorsch discloses the claimed invention except explicitly disclosing that the hole in the patch is reinforced about its periphery. It is well known and common knowledge in the art to provide reinforcing about a hole in a fabric/weave in order to prevent tearing. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include a stitching around the periphery of the hole in order to prevent tearing.
